

Assignment 1

Yuxiao Ma

Based on our group discussion, we talked about the contract of group project. And we agreed on the goals and process and requirements for completing our group assignments for this course. Since two members of the group didn't show up, it was a consolidation of just the three of us (and I think our consolidation was awesome and detailed).

During this course discussion, I found learning to plan for the future of the group. Being able to agree on many of the details before starting can help in the subsequent development of the assignment and save time and effort. Moreover, it was another experience of harmonizing the different qualities of the group members.
